

FIRESTOP SYSTEM INSPECTOR

COMPANY

Firestop Consulting Associates is a woman owned small business enterprise located in Littleton, CO. With over 19 years of experience in the firestop industry, managing partners, Sara and Todd Jilbert founded the company in July of 2013 on the principles of exceptional people, resolute integrity, and focused expertise. We believe that our people define who we are and where we are going. We strive to attract, retain, and engage the best talent in the industry. If you are interested in joining a team of motivated individuals working at the forefront of the industry, we are interested in meeting you.

JOB DESCRIPTION

Firestop Consulting Associates is currently seeking a firestop system inspector. The position requires complex, technical, and physical work performed on new construction projects, renovation projects, and existing facilities.

RESPONSIBILITIES

- Review approved construction documents including deferred firestop submittals for compliance with local, state and national building code requirements.
- Inspect installed firestop systems on commercial, industrial, multi-family, and other projects per ASTM E 2174 and ASTM E 2393 for compliance with applicable building codes during all phases of construction, alteration, and repair.
- Attend pre-con and design review meetings to assist in development and early phases of the construction process.
- Provide a professional level of customer service by identifying issues and working towards code compliant solutions.
- Coordinate with AHJs such as fire, building inspection, and state officials in the inspection process to ensure that buildings meet the intent of the applicable building codes.
- Keep accurate records and provide daily field inspection reports including time logs and mileage.
- Understand the testing facilities' and manufacturers' installation requirements for devices and systems that are not defined within the building codes.
- Maintain relationships with building officials and state officials.
- Strong understanding of local, state, and national building codes including IBC & NFPA.
- Membership and active involvement within local and national organizations including ASTM, ICC, and ASHE.
- Maintain recognized and documented continued education.

SKILLS, EXPERIENCE, AND EDUCATION QUALIFICATIONS

- Must have a valid Colorado Driver's License.
- Must have successfully completed the 40-60hr study material and passed the International Firestop Council's firestop inspector exam, or the ability to do so within 90 days of employment.
- Must have a minimum high school diploma. A college degree in Architecture and/or Engineering is preferred.
- Must have completed a 10hr OSHA construction safety course, or the ability to do so within 90 days of employment.
- Must be able to lift a minimum of 50#.
- Must be able to climb up and down stairs and ladders to perform inspections.

- Minimum 2 years Building Inspector experience, ICC Commercial Building Inspector (CBI), and/or ICC Fire Inspector (FI 1 or 2) certification preferred.
- Experience with the inspection and reporting process as defined by the IBC.
- Experience inspecting, installing, and/or designing firestop systems.
- Familiarity with the American Society for Testing and Materials (ASTM). Specifically, E06 committee and the inspection standards ASTM E 2174 and ASTM E 2393.
- Ability to communicate both written and verbally in a clear, concise and professional manner.
- Strong computer skills including Word, Outlook, Excel, pdf, and BlueBeam.
